

## Back-end Web Developer JD

### Company Brief

Shades of Web is a new age digital communication company. We have set sail to mark our own place in the world of internet communications with our unique way of approaching the world. We are a team of ambitious professionals who aim to lead, not follow.

We have been working with many national and international clients, helping them grow and position themselves better for the future.

We are currently working on some marquee international projects for which we are looking to add few web developers in our team, who have passion for this field and willing to work hard to be our partners in growth.

### Job Description

We are looking for an experienced Back-End Web Developer who will handle server side of the web applications. You will be responsible to take the ownership of the server-side logic and neat integration of back-end with the front-end.

You should be able to develop and maintain functional and stable web applications as per the requirement. You are expected to ensure the efficiency to deliver high performing applications.

### Responsibilities

- ✓ Develop the entire lifecycle of the application
- ✓ Performance optimisation of the application
- ✓ Development of user friendly and customized Back-end
- ✓ Optimize applications for speed and scalability
- ✓ Writing reusable modules of code
- ✓ Analyse and troubleshooting applications

### Requirements

- ✓ In-depth knowledge and hands on experience of PHP and its different frameworks
- ✓ Understanding basic front-end technologies
- ✓ Proficiency of DBMS
- ✓ Knowledge of CMS frameworks
- ✓ Experience with Wordpress
- ✓ Data migration, transformation, and scripting
- ✓ Good experience with REST APIs
- ✓ Server Knowledge, (Basic Understanding of Apache, NGINX, MySQL, and Linux CLI)
