

Front-end Web Developer JD

Company Brief

Shades of Web is a new age digital communication company. We have set sail to mark our own place in the world of internet communications with our unique way of approaching the world. We are a team of ambitious professionals who aim to lead, not follow.

We have been working with many national and international clients, helping them grow and position themselves better for the future.

We are currently working on some marquee international projects for which we are looking to add few web developers in our team, who have passion for this field and willing to work hard to be our partners in growth.

Job Description

We are looking for a qualified Front-End Web Developer who has a knack for the design aspects of the web application. You will be responsible for translating UX/UI design to actual code that will create visual elements and effects of the web application.

You will work closely with the UI/UX designer and help bridge the gap between graphical design and technical implementation. We expect you to be enthusiastic about front -end technologies and willing to learn the latest trends that will help you transform the graphics into the code seamlessly.

Responsibilities

- ✓ 'Design to Code' Implementation
- ✓ Develop User Friendly Interfaces
- ✓ Integration of Front-end with Back-end
- ✓ Optimize applications for speed and scalability
- ✓ Writing reusable modules of code
- ✓ Ensure the technical feasibility of UI/UX designs
- ✓ Building responsive and mobile optimized designs

Requirements

- ✓ In-depth knowledge and hands on experience of mark-up languages
- ✓ Understanding basic design principles
- ✓ Proficiency with CSS3
- ✓ Understanding of server-side scripting
- ✓ Experience of JavaScript and jQuery
- ✓ Good understanding of AJAX
- ✓ Understanding cross-browser compatibility issues and solutions
- ✓ Experience of AngularJS, ReactJS
